Species positive per taxonomic group
Positive tips per clade
1
3031
Function
chemoheterotrophy
aerobic chemoheterotrophy
fermentation
nitrate reduction
gelatin degradation
anaerobic chemoheterotrophy
facultative anaerobes
ureolysis
obligate anaerobes
acetate oxidation
human associated
animal parasites or symbionts
lactate oxidation
aromatic compound degradation
sulfur reduction
nitrogen respiration
lactic acid fermentation
nitrate respiration
respiration of sulfur compounds
mammal gut
cellulolysis
human pathogens all
phototrophy
nitrogen fixation
hydrocarbon degradation
nitrite respiration
dark hydrogen oxidation
thiosulfate respiration
xylanolysis
sulfur respiration
nitrate denitrification
human gut
methylotrophy
photoautotrophy
methanol oxidation
alcohol fermentation
dark oxidation of sulfur compounds
sulfate respiration
chitinolysis
plastic degradation
photoheterotrophy
aromatic hydrocarbon degradation
plant pathogen
nitrite denitrification
sulfite respiration
pectin degradation
fumarate respiration
dark thiosulfate oxidation
oil bioremediation
methanogenesis
oxygenic photoautotrophy
reductive acetogenesis
invertebrate parasites
iron respiration
dark sulfur oxidation
anoxygenic photoautotrophy
intracellular parasites
aliphatic non methane hydrocarbon degradation
methanogenesis by CO2 reduction with H2
anoxygenic photoautotrophy S oxidizing
dark sulfide oxidation
nitrous oxide denitrification
hydrogenotrophic methanogenesis
alginate degradation
methanotrophy
methanogenesis using formate
nitrite ammonification
aerobic anoxygenic phototrophy
iron oxidation
human pathogens pneumonia
nitrate ammonification
anoxygenic photoautotrophy H2 oxidizing
dark iron oxidation
manganese respiration
human pathogens septicemia
collagen degradation
methanogenesis by disproportionation of methyl groups
nitrification
arsenate respiration
human pathogens meningitis
ligninolysis
knallgas bacteria
dissimilatory arsenate reduction
aerobic ammonia oxidation
human pathogens gastroenteritis
human pathogens diarrhea
manganese oxidation
dark sulfite oxidation
fish parasites
predatory or exoparasitic
acetoclastic methanogenesis
chlorate reducers
dissimilatory arsenite oxidation
human pathogens nosocomia
anammox
aerobic nitrite oxidation
arsenite oxidation detoxification
methanogenesis by reduction of methyl compounds with H2
arsenate detoxification
anoxygenic photoautotrophy Fe oxidizing
arsenite oxidation energy yielding
